## SOFTWARE PACKAGES

### The Works • \$9,500

Everything you need! Save \$1,700 when you buy our most popular package. Includes the SQL Bridge Module, Vision Module, and Reporting Module.

### Mission Critical • \$18,000

Cluster two systems together for redundancy and load-balancing. Save \$4,400. Includes two of everything in The Works package.

### Hub and Spoke • 15% discount

Reliable remote data collection. Multiple SQL Bridge Modules use store and forward to collect data in a central database. Discount eligible for purchases that include 1 Vision Module and 3 or more SQL Bridge Modules.

## INDIVIDUAL MODULES

### OPC-UA Module • free

A cross-platform, high-performance OPC-UA server with a plug-gable driver model. Includes drivers for many popular protocols.

### SQL Bridge Module • \$2,500

Bridges PLC data from OPC to SQL databases. Includes transaction group manager and SQL tag historian. Unlimited data points. Limited edition (basic SQL data logging only) available for \$950.

### Vision Module • \$6,500

Creates powerful HMI/SCADA clients that launch anywhere on your network. Access real time and historical data. Includes unlimited clients, screens, and data points. Limited edition (up to 5 concurrent clients) available for \$3,500.

### Vision Panel Edition • free

Designed for HMI touchscreens, includes 1 local status and control client only. No historical or SQL access.

### Reporting Module • \$2,200

Creates dynamic, database-driven PDF reports.

\*Bulk, OEM, Site, and Corporate licenses are available. Call for details.
