

HMI / SCADA Software

Modules and Packages

SOFTWARE PACKAGES

Packages offer discounts on popular combinations of modules, making it easy to get started with Ignition.

The Works • \$9,925

Everything you need! Save \$1,750 when you buy The Works, our most popular package. Includes the SQL Bridge Module, Vision Module, Reporting Module and Symbol Factory Module. Get 15% off any additional modules purchased with this package.

Mission Critical • \$18,400

Link two Ignition systems together to create a fault-tolerant redundant pair. Avoid data loss and downtime when the unexpected happens. Save \$4,500 with this package. Includes two licenses for the SQL Bridge, Vision, and Reporting modules, and one license for the Symbol Factory Module. Get 20% off any additional modules purchased with this package.

Hub and Spoke • 15% discount

Increase the reliability of your remote data collection. Deploy multiple SQL Bridge modules in remote locations that use store-and-forward to send data to a central database. Purchases are eligible for a 15% discount when buying one Vision Module and three or more SQL Bridge Modules.

INDIVIDUAL MODULES

Customize your installation by purchasing individual Ignition modules that fit your needs. You only need to purchase modules when they are not part of a package.

Vision Module • \$6,975

Creates powerful HMI/SCADA clients that launch anywhere on your network. Access real-time and historical data. Includes unlimited clients, screens, and data points. Symbol Factory Module included. Limited edition (up to 5 concurrent clients) available for \$3,975; Symbol Factory Module included.

SQL Bridge Module • \$2,500

Bridges PLC data from OPC to SQL databases. Includes transaction group manager and SQLTags Historian. Unlimited data points. Limited edition (basic SQL data logging only) available for \$950.

Reporting Module • \$2,200

Creates dynamic, database-driven PDF reports.

Mobile Module • \$3,500

Extends the Vision Module to provide access to compatible mobile devices. Create custom dashboards and mobile apps to access data on the go.

OPC-UA Module • free

A cross-platform, high-performance OPC-UA server with a pluggable driver model. Includes drivers for many popular protocols.

Vision Panel Edition • free

Designed for HMI touchscreens, includes one local status-and-control client. No historical or SQL access. Does not include Symbol Factory Module.

Note: Bulk, OEM, site, and corporate licenses are available. Call for details.
