

# Training

Learn how to use Ignition and discover its full potential through live training courses taught in a computer-lab classroom. By completing the Ignition Core Course, you should be able to complete the exam and earn your certification in Ignition.

## LIVE COURSES

Each attendee will get an individual computer for their own use during each course, and each attendee will receive their own set of training materials to keep.

*Receive a 10% discount on all training courses with the Total Care™ Support Contract.*

### 5-Day Ignition Core Course • \$2,500 per person

The curriculum includes lecture, demonstration, and the creation of a live project that gives each student hands-on experience with all the major features of Ignition.

First Attendee ..... \$2,500  
Each Additional Attendee ..... \$2,000

### 3-Day Ignition Advanced Course • \$1,500 per person

The curriculum includes some lecture and is mostly demonstration of advanced features and concepts in using Ignition.

First Attendee ..... \$1,500  
Each Additional Attendee ..... \$1,000

### 4-Day OEE Downtime Course • \$2,000 per person

The curriculum begins with OEE, TEEP and downtime concepts and formulas. It then continues with installation, analysis, production model configuration, and modification of user screens and reports.

First Attendee ..... \$2,000  
Each Additional Attendee ..... \$1,500
